Not suitable for for larger surfaces, Polyethylene (PE), Polypropylene (PP) and P.T.F.E. Do not use on supporting elements or objects permanently under tension. Do not use on heat sensitive materials.

### PROPERTIES

- Transparent and high- strength
- Short setting time
- Solvent free
- Ø 7 mm

### PREPARATION

**Working conditions:** Do not use at temperatures below +5°C.

**Surface requirements:** The surfaces to be glued must be dry and free of grease and dust.

**Preliminary surface treatment:** If necessary, slightly roughen up surface to be bonded.

### APPLICATION

#### Directions for use:

Apply the glue quickly, and not too sparingly. Stick the two pieces together immediately. Always apply the glue to the harder material. Glue application: on flexible surfaces, apply the glue in thick lines; on hard surfaces, you can apply the glue in thick lines or in dots. The glue can be used to fill small holes and cracks.

Our advice is based on extensive research and practical experience. However, in view of the large variety of materials and the conditions under which our products are applied, we assume no responsibility for the results obtained and/or any damage caused by the use of the product. Nevertheless, our Service Department is always at your disposal for any advice needed.
